The Healthy CPS averages outlined below are calculated from Healthy CPS Survey respondent data. Each school’s Healthy CPS status will be reflected on their school year 2017-2018 School Progress Report.

Healthy CPS demonstrates a school’s commitment to a safe and healthy learning environment by offering access to daily physical activity, nutritious foods, school-based health services, health education and supports for students with chronic conditions.

The Healthy CPS Indicator is the first ever comprehensive health-focused measure that is included on the CPS school progress report. It was created to help schools streamline health and wellness initiatives already taking place at the school. Learn more at cps.edu/HealthyCPS.
On average, schools that responded to the Healthy CPS Survey in School Year 2017-2018 aligned to 76% of Healthy CPS Criteria.

On average, schools that responded to the Healthy CPS Survey in School Year 2016-2017 achieved 73% of Healthy CPS criteria.
